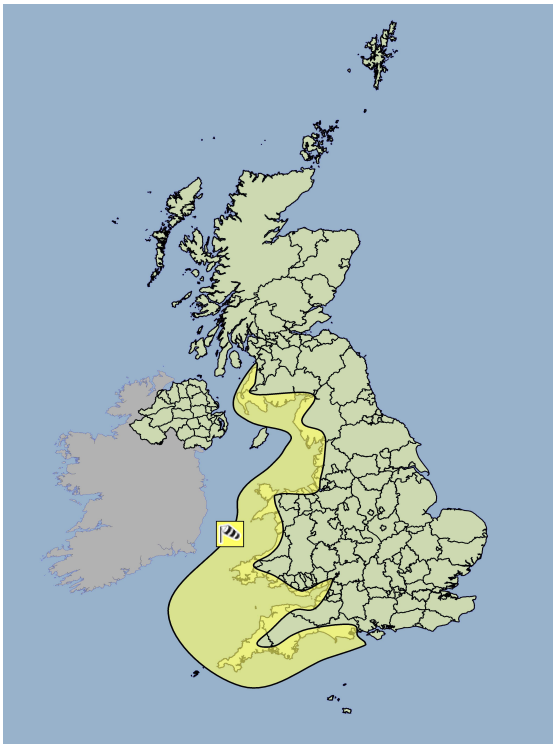
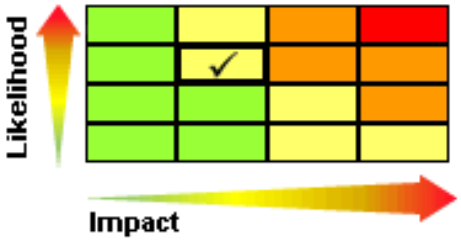
National Severe Weather Warning Service





CANCELLED

Chief Forecasters Assessment
Another spell of wet and windy weather will affect the British Isles on Sunday as a new, deep depression becomes anchored over the eastern Atlantic Ocean bringing a spell of gales with gusts to around 50 MPH to coasts and hills. Whilst this is not especially strong, lowering pressure will combine with high tides around the UK coastline and bring the risk of some flooding.

The Met Office have issued a **Yellow Alert** of **Wind**

Valid from **09:00 on Sun, 05th Jan 2014** until **18:00 on Sun, 05th Jan 2014**

Further wet and windy conditions are expected on Sunday, windiest conditions then expected across western areas. Here tides will be very high, and the public should be aware of the risks of large waves and coastal flooding.
